SKILLS

Use At Work

- ReactJS
- Express
- MongoDB
- TailwindCSS
- NextJS
- AWS
- Git
- Docker

Use For Fun

- Figma
- Canva
- Wordpress
- WebFlow
- Django
- Python

EDUCATION

Certification

MERN Stack	Jul 2022
UI Design	Feb 2023
Node JS	Oct 2022

Schooling

B.Tech in CSE
Lovely Professional University | **8.34 CGPA**
Apr 2020 - Apr 2024

Higher Secondary
Sri Chaitanya | **97%**
Jun 2019 - Mar 2020

HOBBIES

- Watching YouTube
- Si-Fi documentaries
- Designing UI/UX

WORK EXPERIENCE

FULLSTACK DEVELOPER
Aug 2023 - Present

MapUp

NextJS || Express || MongoDB || TypeScript
Astro || AWS || Git || GO || Docker

- Collaborated with data and development teams to:
  - Launch project MVP, gather feedback from 50 customers,
  - Employ an industry-standard plugin for Motive marketplace.
  - Ensured that it was scalable at least up to 100,000 users, by using a combination of AWS and ExpressJS for data storage and computing.
- Created 1 map to visualise Toll data:
  - Visualising the high-quality toll boundaries for the visible region and low-quality boundaries for the rest of the map.
  - Gained 580% faster loading time.
- Refactoring the TollGuru dashboard from WordPress to Astro:
  - This was crucial for faster loading, clean and consistent UI.

MY STARTUP
Aug 2022 - Aug 2023

Foozy

NextJS || Express || MongoDB || Redux || Figma
Google OAuth || Firebase OTP || Web push notification

- Built and launched a food preordering platform in 4 months:
  - Empowered over 5 local vendors to collect online orders.
  - Executed a successful pilot run for 40 days, Partnered with with 2 real shops and serving 300+ happy customers.
  - Achieved sales of INR 50,000 during the pilot run, achieving a 20% increase in revenue for participating vendors.
- Technology and Design:
  - Leveraged Next.js and Tailwind CSS to build a highly interactive and user-friendly interface, resulting in a 30% reduction in order processing time.
  - Executed the backend using Express.js and MongoDB, enhancing data management and achieving a 40% improvement in system performance.
  - Crafted the UI/UX using Figma, resulting in a 50% decrease in user complaints and a increase in customer satisfaction.
- Deployment and Collaboration:
  - Rolled out the frontend on Vercel, backend on Railway, and database on MongoDB Atlas, ensuring a reliable and scalable platform with 99.9% uptime.
  - Performed user research and obtain feedback from 50 users to persistently refine the platform's user experience.

MINI PROJECTS
Jan 2023 - Present

Freelance

Figma || Wordpress || Canva

- Collaborated with over 30 diverse clients:
  - Enhanced conversational skills and styling abilities.
  - Exceeded requirements and facilitated clear communication. .
  - Nurtured creativity and remained abreast of design trends to deliver exceptional results across industries.
