CAREER SUMMARY

Full Stack Developer with 3 years of experience in MERN stack, NextJS, and Figma. Built and launched web applications including a multi-vendor platform and admin dashboards. Strong skills in UI/UX design and data visualization. Looking for a Full Stack Developer (FE heavy) role.

WORK EXPERIENCE

MapUp   **Hyderabad, Telangana**
Full Stack Developer   *Aug 2023 - Present*
- Collaborated with data and development teams to launch project MVP, gathering feedback from 10 customers and implementing an industry-standard plugin for the Motive marketplace.
- Ensured scalability for up to 50,000 users by utilizing a combination of AWS and ExpressJS for data storage and computing.
- Created a map to visualise Toll data, resulting in a 580% faster loading time by displaying high-quality toll boundaries for visible regions and low-quality boundaries elsewhere.
- Refactored the TollGuru dashboard from WordPress to Astro, significantly improving loading speed and achieving a clean, consistent UI.

Freelance Projects   **Remote**
Front End Developer, UI/UX, Advert Designing   *Jun 2022 - Present*
- Collaborated with over 30 diverse clients, enhancing conversational skills and styling abilities.
- Exceeded client requirements and facilitated clear communication throughout project lifecycles.
- Nurtured creativity and remained abreast of design trends to deliver exceptional results across industries

NexCart   **Remote**
Front End Developer   *Jul 2021 - Mar 2022*
- Developed a web application to display dashboard data received from 2000+ shopkeepers associated with NexCart.
- Utilized ReactJS for admin dashboard development, ensuring a responsive and user-friendly interface.
- Utilized libraries like Apex charts and React Lightweight charts to create interactive charts and graphs.

Personal Project

Foozy   **Jalandhar, Punjab**
Full Stack Developer, UI/UX   *Jun 2022 - Jul 2023*
- Built and launched a multi-vendor food preordering platform in 4 months, empowering over 5 local vendors to collect online orders.
- Executed a successful 40-day pilot run, partnering with 2 real shops and serving 300+ happy customers, achieving sales of INR 50,000 and a 20% increase in revenue for participating vendors.
- Leveraged Next.js and Tailwind CSS to build a highly interactive and user-friendly interface, resulting in a 30% reduction in order processing time.
- Implemented the backend using Express.js and MongoDB, enhancing data management and achieving a stable backend.
- Crafted the UI/UX using Figma, resulting in a decrease in user confusion and an increase in customer satisfaction.

EDUCATION

Lovely Professional University   **Punjab, India**
B.Tech in Computer Science and Engineering   *Jul 2024*
- 8.6 CGPA, Computer Science fundamentals, Web Development.
